

Day 3 - API Integration and Data Migration

Nike store

Date: 17-1-25

Name: Mehwish Sajjad

Project: API Integration and Data Migration

Overview:

The primary focus of Day 3 was on integrating APIs, specifically with **Sanity CMS**, using **GROQ queries**, and updating the schema to support dynamic data requirements. Here's a summary of the tasks accomplished:

Key Objectives:

1. Establish a connection with Sanity CMS for managing product data efficiently.
 2. Implement **GROQ queries** to fetch structured data dynamically from Sanity.
 3. Update the **Sanity schema** to align with the evolving requirements of the api.
 4. Migrate product data from an external API to Sanity CMS, including image uploads.
 5. Test and validate the integration to ensure smooth data flow between the backend and frontend.
-

1. API Data Migration to Sanity:

- **Objective:** ○ Migrate product data, including images, from an external API to Sanity CMS.

- **Steps Taken:**

1. Fetch Product Data:

- Used Axios to retrieve product data from an external API.
- Example API Endpoint: <https://template-03api.vercel.app/api/products>.

2. Upload Images to Sanity:

- Uploaded product images using the `client.assets.upload` method.
- Ensured that each image was linked to its respective product.

3. Create Product Documents in Sanity:

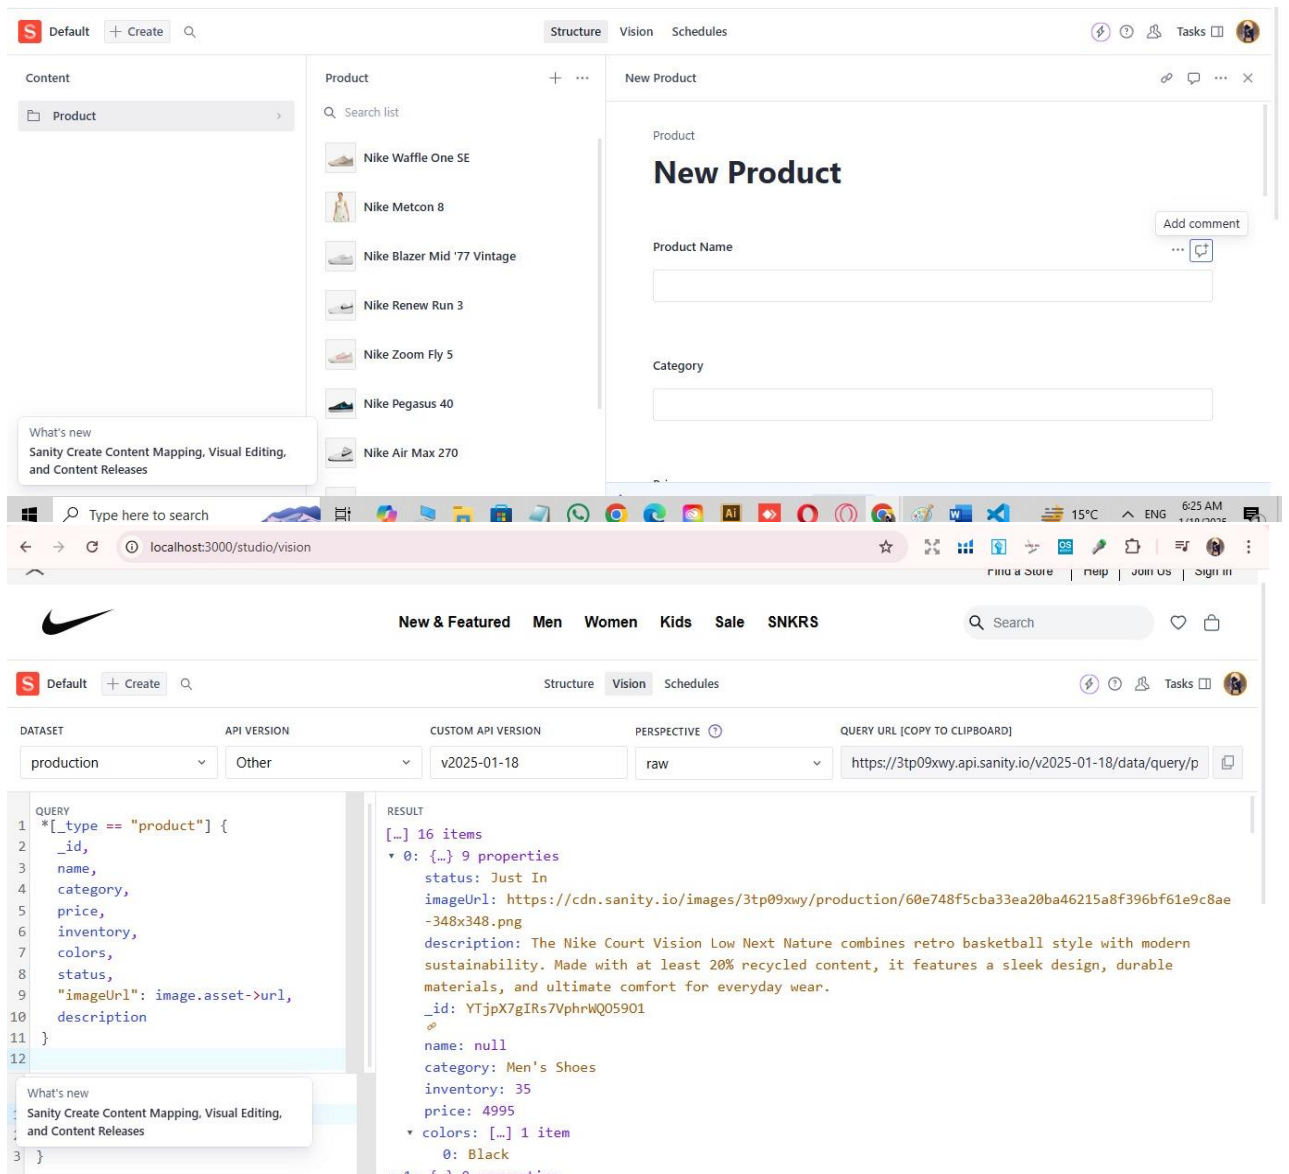

- Iterated over the fetched data and created a corresponding product document in Sanity using the `client.create()` method.

```

    description: 'The Nike Court Vision Low Next Nature combines retro basketball style with modern sustainability. Made with at least 50% recycled content, it features a sleek design, durable materials, and ultimate comfort for everyday wear.'
  }
]
```

2. Sanity CMS Integration:

- **Connection Setup:**
 - Integrated the `@sanity/client` library into the project to enable communication with the Sanity CMS.
 - Configured the client using project-specific credentials, including the `projectId`, `dataset`, and `apiVersion`.
- **Purpose:** To centralize product management and leverage Sanity's features, such as realtime updates, robust content modeling, and optimized image handling

```

> JS importSanityData.mjs > [E] client
import { createClient } from '@sanity/client';
import axios from 'axios';
import dotenv from 'dotenv';
import { fileURLToPath } from 'url';
import path from 'path';

// Load environment variables from .env.local
const __filename = fileURLToPath(import.meta.url);
const __dirname = path.dirname(__filename);
dotenv.config({ path: path.resolve(__dirname, '../.env.local') });

// Create Sanity client
const client = createClient({
  projectId: process.env.NEXT_PUBLIC_SANITY_PROJECT_ID,
  dataset: process.env.NEXT_PUBLIC_SANITY_DATASET,
  useCdn: false,
  token: process.env.SANITY_API_TOKEN,
  apiVersion: '2021-08-31'
});

async function uploadImageToSanity(imageUrl) {
  try {
    console.log(`Uploading image: ${imageUrl}`);
    const response = await axios.get(imageUrl, { responseType: 'arraybuffer' });
    const buffer = Buffer.from(response.data);
    const asset = await client.assets.upload('image', buffer, {
      filename: imageUrl.split('/').pop()
    });
    console.log(`Image uploaded successfully: ${asset._id}`);
    return asset._id;
  } catch (error) {
    console.error('Failed to upload image:', imageUrl, error);
    return null;
  }
}

```

```

3. Schema Enhancements in Sanity CMS:

- Updated the product schema to align with the requirements of the application, ensuring it could handle new fields and validations.
- Fields Added/Updated:**
 - inventory:** Tracks stock levels for products.
 - colors:** Stores available color options as an array.

| ✓ | ✓ | ✓ | ✓ | ✓ |

Outcomes of Day 3:

- Successfully integrated **Sanity CMS** with the application.
- Implemented dynamic **GROQ queries** to fetch and display product data.
- Enhanced the Sanity schema to support extended product attributes.
- Migrated data and images from an external API to Sanity CMS.
- Validated and tested the integration to ensure seamless backend-to-frontend data flow.

This concludes my Day 3 Hackathon work by **Mehwish Sajjad** I will continue to work diligently to turn these features into reality for my e-commerce website
